

FÁBIO BAZIOTA

Full Stack Software Developer | Java · Spring Boot · React · Angular · Vue.js · TypeScript · Node.js

Luanda, Angola, Morro Bento | +244 930 125 546 | fabiobaziota@gmail.com | linkedin.com/in/fabio-baziota | github.com/BaziotaBeans | 1000017079@ucan.edu

Professional Summary

Full Stack Systems Developer with end-to-end experience developing and maintaining enterprise and Web applications. Strong command of Java (Spring Boot), Node.js, PostgreSQL, and the Web ecosystem (JavaScript, HTML5, CSS3, React, Vue.js). Solid track record designing RESTful APIs, scalable system architecture, and third-party service integration. Analytical profile focused on problem-solving, security best practices, automated testing, and delivering results in collaborative environments.

Technical Skills

- Languages & Frameworks: HTML, CSS, C, Shell Script, JavaScript, TypeScript, Java, Python, React, Next.js, React Native, Angular, Vue.js, Node.js, Spring Boot, Flutter
- Web Animation: CSS animations/transitions, Framer Motion/Motion, GSAP
- Data & Infrastructure: SQL, PostgreSQL, MySQL, Oracle, Firebase (Auth, Firestore, Storage), Docker, Redis, CI/CD, Terraform, Observability, WebSockets, JPA/Hibernate
- Architecture: RESTful APIs, authentication & authorization, microservices, Event-Driven Architecture (EDA), multi-tenant architecture, third-party service integration
- Quality & Process: Test-Driven Development (TDD), Jest, React Testing Library, Cypress, Playwright, Vitest, Selenium, Postman, Insomnia, Agile/Scrum, Jira, Code Review
- Other: Git & GitHub, Figma, SEO, Performance Optimization

Professional Experience

Software Developer

Fisgar — Brazil (Remote) | 2025 – 2026

- Develop, maintain, and continuously evolve the fisgar.com.br platform, delivering new features to a production environment.
- Stack: Next.js, React, Node.js, Spring Boot, Firebase, and WebSocket, with automated testing via Jest and React Testing Library.
- Work within a TypeScript/React ecosystem focused on high-availability web applications.

Software Developer

Cherry IT — Brazil (Remote) | 2024 – 2025

- Provided technical leadership for the frontend team of a public investment management system for the State of Ceará.
- Implemented reusable components and custom libraries to optimize performance and consistency across projects.
- Collaborated directly with design and backend teams on API integration, ensuring product functionality and usability.
- Tracked best practices and emerging technologies to keep projects current and efficient.
- Defined frontend architecture.
- Made technical decisions.
- Conducted code reviews.
- Oversaw delivery tracking.

Software Developer

Sparktech — Angola | 2021 – 2025

- Contributed to the development of the Ventus platform and led the frontend development team for the Cinemax platform.
- Implemented features and reusable components with React and TypeScript.
- Built cross-platform mobile applications with React Native and desktop applications with Electron.
- Integrated RESTful APIs for backend communication and optimized performance and SEO in Next.js applications.
- Participated in code reviews and mentored junior developers.

Teacher & Software Developer

Ramos Soft — Angola | 2017 – 2018

- Taught programming logic using C.
- Taught Algorithms and Data Structures.
- Developed corporate desktop applications with Java (Java SE), JDBC, and MySQL.
- Developed web applications with Java (JSP) on Tomcat and MySQL, and with Java (JSF + PrimeFaces) on WildFly and PostgreSQL.
- Developed and deployed APIs with Spring Boot and PostgreSQL.

Projects

OdontoPro — Multi-tenant SaaS Platform for Dental Clinics

Personal project (co-developed) | Ongoing

- Developed the SaaS product end-to-end, from concept and architecture through implementation and continuous evolution.
- Multi-tenant architecture with Spring Boot, PostgreSQL/JPA-Hibernate on the backend and React (TanStack Router) + TypeScript on the frontend, built for the Angolan market.
- Modeled clinical domain data: digital odontogram (FDI/ISO 3950 notation, 32 teeth, multiple states per tooth) and treatment plans with TOOTH/ARCH/GENERAL scopes.
- Built a dynamic, clinic-configurable anamnesis form using React Hook Form, Zod, and JSONB-based answer storage.
- Designed the product's design system: color tokens, typography, and a reusable component library with Tailwind CSS.
- Developed complex interfaces and flows oriented around user experience.

go_bus — Real-Time Bus Ticket Booking System

Personal project |

- Built a Spring Boot backend with temporary seat locking via Redis and confirmed reservations in PostgreSQL, with scheduled reconciliation jobs.
- Implemented real-time seat map updates via WebSocket/STOMP with a two-layer authentication strategy.
- Built a React/TypeScript frontend with TanStack Router, React Hook Form, and Zod for trip search and form state management.

Education

Bachelor's Degree in Computer Engineering (2023/2024)

Universidade Católica de Angola

Certifications & Additional Training

- CCNA (Cisco Certified Network Associate) I and II
- Rocketseat — Ignite (2022), Electron (2022)
- Design Patterns — Udemy (2022)
- SEO — Udemy (2022)

- Spring Boot — Udemy (2023)
- Flutter — Udemy (2024)
- Reactive Forms — Rocketseat · [Certificate](#)
- Signals — Rocketseat · [Certificate](#)
- Angular 20 and Operators — Rocketseat · [Certificate](#)
- GoTask Project — Rocketseat · [Certificate](#)
- Containers with Docker and Docker Compose · [Certificate](#)
- DevOps Culture Fundamentals · [Certificate](#)

Languages

Portuguese — Native

French — Listening Comprehension, Reading and Speaking: C2 (Mastery)

English — Listening and Reading Comprehension: B2 (Advanced Intermediate) | Speaking: B1 (Intermediate)
